

CHINCHILLA CSG WASTE DUMP AT BAKING BOARD HILL

A company called **'We Kando Pty Ltd'** has approval for a 15 million tonne **CSG Workshop Waste Dump** and **Commercial Salt Storage Facility** on Baking Board Hill near Chinchilla.

The dump is above the local flood plain and is in an area just 50m from Stockyard Ck, which is a tributary of the Condamine River in the headwaters of the Murray Darling Basin, a sensitive discharge area and Priority Agricultural Land on both the eastern and southern sides.

Local farmers including Glen Beasley, Dave McCabe and the **Cameby Concerned Citizens Group** are trying to come to terms with what this might mean for farming in the region and are deeply concerned about the potential threat to the Condamine River system.

THE 'SALT STORAGE' APPROVAL IS BROKEN INTO:

1. 4.5 million tonnes of **PRODUCT SALT** from the reverse osmosis water treatment plant at 900,000 tonnes p.a. for 5 years.
2. 900,000 tonnes of **WASTE LANDFILL SALT** at 45,000 tonnes p.a. for 20 years. This material will contain Arsenic, Cadmium, Chromium, Lead, Thallium, Selenium, Thorium and Uranium along with BTEX chemicals (benzene, toluene, ethylbenzene and xylene)

Cameby Concerned Citizens Group is a small group of local residents and landholders who see this salt dump proposal as a contamination hazard for the Murray-Darling system. The site selection is entirely inappropriate.

Grounds for objection are evident through provisions in the EPBC Act. The CCCG is referring the matter to the Queensland Ombudsman. We ask that you support us in whichever way you can. Public awareness amongst downstream users, letters to your MPs and newspapers are invaluable.

Any and all offers of support are gratefully accepted.

Water is Life.
